DECIDUOUS SHRUBS & VINES

Stocks offered for 1945 are substantially similar to 1944 in variety; with few changes in sizes available. Please refer to our 1944 catalog for price schedules which will remain at last year's moderate levels.

Our comprehensive descriptive check list of shrubs especially suited to foundation plantings for the small home is available on request.

Some shrubs, including Pink Flowering Almond, Buddleias Ile de France and Dubonnet, and Flowering Plum will be available in large Cloverset pots for late Spring and summer planting; as will our usual top-quality large flowering clematis—Jackmanni, Henryi, Mme. E. Andre, Ramona, Ville de Lyon; priced same as 1944.

Planting charge for trees and shrubs is 30% of invoice.

HARDY PERENNIAL PLANTS

All plants here offered have been grown in our own gardens and are fully winter-hardy under our conditions. They are robust, well-rooted, blooming size except as otherwise noted. Divisions will be supplied where that is the trade custom, as in the case of iris, daylilies, etc. Others are delivered in bands, pots, or dug from field, each species being handled according to its needs by methods that insure your getting the strongest possible plants.

Hardy Asters, dwarf—growing only 12 to 15 inches tall
Victor, blue, 40c. **Nancy**, pink, 40c. **Niobe**, white, 40c.

Hardy Asters, medium height (30 to 48 inches)
Adorable, pink, 75c. **Blue Bouquet**, 50c. **Violetta**, 50c.

Babysbreath, Bristol Fairy, double everblooming 75c
Babysbreath, old-fashioned single 25c

Bleedingheart in large Cloverset pots, buds & bloom 95c

Chrysanthemums

First blackface letter following variety name indicates height of plant. Second letter indicates shape and form of bloom.

Height: S—short, M—medium, T—tall. Form of flower: D—decorative, P—pompon or button, L—large, incurved or aster type, S—single.

To our Wyoming friends: Varieties marked * are extra-early super-hardy varieties that will bloom before frost in elevations up to 8000 feet.

RICHARDS' ROSES—THE F

Experience has proven that dormant roses can successfully be planted in Northern Colorado only until the middle of April. As it is almost impossible to get root action to start and make plants grow after the days get warm we do not sell dormant roses after that time, but have most varieties as growing plants in large "Cloverset" pots.

When you buy Richards' Roses in pots they are already planted properly in specially prepared fertilized soil to insure rapid, permanent growth and bloom. You can plant them at any time through the summer. Drive out to our gardens and make your own selection while plants are in bud and bloom and get IMMEDIATE EFFECT in your own garden. For sale only at our gardens—CANNOT BE SHIPPED.

Please Note: Due to the terms of sale specified by the patent owners, we give no guarantee on patented roses.

Roses like this obtainable only at Richards'

FINEST MONEY CAN BUY

Again we offer you only the cream of the Rose crop, thoroughly adapted to the rigors of climate in the Mountain States. 2-year No. 1 field-grown plants, budded low on Ragged Robin (Gloire des Rosomanes). Grown in a high Sierra valley in altitude and climate similar to our own Northern Colorado.

Terms and Conditions of Sale

Prices quoted herein cancel all previously quoted prices and are net, cash with order. Please do not ask for C. O. D. shipments, which are impossible this year.

We will deliver free anywhere in Fort Collins or immediate vicinity all orders of \$3.00 or more but delivery time will have to be at our convenience. Carrying charges are extra on orders to distant points and will be collected by transportation company on delivery. We assume no responsibility for safe delivery by common carriers.

Sorry—we simply can't plant it for you this year. With more work than ever before and less help than ever before it can't be done, much as we would like to.
